| <b>Material</b>           | steel                                                        |
| <b>Instrument support</b> | non-marring slip-proof material                              |

Extremely stable and robust stand for baritone saxophones. The solid metal construction holds the saxophone securely in position. The instrument supports are completely covered with rubber and protect the instrument from scratches. The upper support for the bell is adjustable in 12 height positions from 650 to 920 mm. The lower support can also be positioned steplessly and individually for each model. An adjustable end cap ensures a stable stand. The high-quality powder coating is very durable.
