

26778

Tiltable clamping desktop monitor stand

Product variant

26778-000-55 - black

Technical Data

Height	from 335 to 435 mm
Clamping range	6 to 52 mm
Visibility	
Bearing plate	230 x 250 mm
Max. load capacity	25 kg
Type	black
Height adjustment	locking screw and safety hook
Price display	
Leg construction	flat steel plate
Quality level	
Material	steel
Special features	4 rubber pads for bearing plate provide for stability and noise filtration; bearing plate can be moved to optimize the center of gravity and rotated by 180°; stop bar prevents the monitor from slipping down
Angle of inclination	0° to 12.5°

Height-adjustable monitor stand with table clamp for near-field monitors. The solid metal construction with the large support plate (230 x 250 mm) is suitable for a wide range of monitors and other equipment in this size range. The plate can be tilted continuously up to 12.5° and moved to optimise the centre of gravity. A stop bar ensures the necessary safety and prevents the monitor from slipping. The practical table clamp enables attachment to tabletops with a thickness of 6 to 52 mm. The individual height can be adjusted in 4 steps between 335 and 435 mm. In terms of load capacity, a centric load of up to 25 kg is possible. The support plate can be rotated 360° for perfect alignment. Rubber pads are included for secure, noise-insulating support of the monitors.
