SpaceWall® slat wall

Product variant

44000-000-00

Technical Data

EAN	4016842401208

With SpaceWall® slat walls you can stylishly design the product presentation thus benefiting from the versatility of this system through user-selectable product displays. The product holders, that are available from us for Euro hole packaging or instruments, are precisely tailored to the SpaceWall® slat wall system. You can configure the SpaceWall® slat walls exactly to your needs. There are no limits to the height and width of the walls, so you can fit them to any wall surface. In addition, you can choose from standard HMB/melamine resin decors such as white, grey, brushed aluminium, black, walnut or fine concrete for the optical design or to slat wall a painted individually in the RAL/NCS colour of your choice or you have it primed ready for painting. The spacing of the slide-in profiles can be selected to match the products you have intended for the wall. The following distances are available: 76.3 mm, 101.8 mm, 152.6 mm, 203.5 mm, 244.2 mm, 305.3 mm. In addition, you can define an area on the top and base section of the slat wall to remain free of insertion profiles if you so wish. Further adaptations to your needs are possible on request. Our sales team will be happy to advise you!
