

19789

Tablet PC stand with boom arm »Biobased«

Product variant

19789-000-55 - black

Technical Data

Leg construction	round cast-iron base
Special features	also suitable for tablets in cases or protective covers
Visibility	
Boom arm clamping	wing nut
Height	from 155 to 307 mm
Rod combination	2-piece folding design
Boom arm	one-piece design
Material	Bio-based plastic, steel
Type	black
Height Stand	from 700 to 1520 mm
Max. load capacity	1 kg
Height adjustment	clutch
Price display	
Angle of inclination	220°
Adjustment	continuous
Depth	18 mm
Base diameter	300 mm
Boom arm length	260 mm

based
PLASTIC

Stable tablet PC stand with space-saving round base and boom arm for use at home, in the studio or on stage. The 300 mm and 4.5 kg cast iron base gives the functional stand a secure footing. With full extension plus vertical boom arm, this results in a max. tablet support height of 1,430 mm. The tablet support is made of bio-based plastics. These plastics contain a proportion of over 50% up to 100% of renewable vegetable raw materials. The use of renewable raw materials helps to conserve limited petroleum resources and reduce harmful CO2 emissions. More information on bio-based plastics at: bioplastics.k-m.de. The universal tablet holder offers a user-friendly clamping mechanism for tablets with a size of approx. 10" to 16" in horizontal - and approx. 7" to 13" in vertical - orientation. The clamping range is between 155 and 307 mm. The holder is also particularly suitable for use with tablets with a protective cover or case up to a thickness of 18 mm. The overlapping clamping jaws with integrated rubber pad guarantee a secure hold and eliminate unwanted vibration noise. The function of the operating elements on the device and the tablet pen (portrait format only) are not affected. The holder can be tilted continuously and, thanks to the flexible boom arm, allows each user to position it individually.
