Spacing of holes	60 mm
Type	black
Height adjustment	non-scratching locking screws
Special features	inclination, alignment and height can be adjusted as required
Price display	
Quality level	
Material	steel
Adjustment	continuous

The 19410 allows equipment to be installed on a desk or other surface using a clamp. Compatible with the Yamaha MSP3A powered monitor and MS101-4 compact speaker for multipurpose applications, the stand allows the position and angle of the speakers to be easily adjusted. This provides a high degree of freedom in installations and is useful in locations where the working space is limited.
