| Type                       | black                                                                                                                              |
| Price display              |                                                                                                                                    |
| Size when folded           | 165 x 100 x 55 mm                                                                                                                  |
| Intensity                  | 2 x ~1,400 lux                                                                                                                     |
| Clamping range             | up to 25 mm                                                                                                                        |
| Light positioning by       | goosenecks                                                                                                                         |
| Connection                 | electric cable 3 m                                                                                                                 |

Another "highlight" from König & Meyer's range of lights. The exceptionally flexible goose neck allows the musician to choose either a focussed beam or flat light. Each lamp head contains a pack with four LEDs, which can be switched on or off individually. The latest LED technology guarantees a bright source of light, long product life and minimal consumption of energy. The light is attached to surfaces with a maximum thickness of 25 mm using the clip. This multi-purpose attractive lamp functions with batteries or external power supply. The power pack and 3 batteries are included in the delivery.
