The standard speaker stand constructed from steel tubing has been significantly improved. The new legs with a tubing diameter of 35 mm and the large, fixed foot end caps guarantee stability and safety. Lasered bore holes and durable, robust plastic saddle washers improve the coefficient of friction between the legs and braces and prevent scratching of the finish. A compact clamp with a push-button system affords user-friendly stand height adjustment. The locking screw provides additional stability and vibration-free speaker mount. Additional features include a pull-out guard for the extension tube, the mounting aid and an integral anti-shock component.
