

December 2013

iPad Air Holders available beginning of February 2014

From January 24 to 27 the NAMM Show in Anaheim / USA will take place. There we'll present the new iPad Air holders! So the König & Meyer holders are expected to be available beginning of February.

Until then as an alternative we can offer the Tablet PC stand holder 19742. Due to its unique tensioning mechanism with a clamping width between 120 and 220 mm this universal holder is suitable for holding securely nearly all standard Tablet PC models. And the holder is also suitable for the iPad Air with a protective sleeve or case.
