Special features	additional guard cams prevent guitar from turning; automatic back release mechanism; support arms work individually; suitable for asymmetric guitar necks
Suitable for	acoustic and electric guitars
Type	black
Weight	0.17 kg
Yoke	self-locking

The new guitar wall mount caters for all your needs. The thick rubber covered support arms are safe and secure for all types of guitar. The arms are adjusted individually and are suitable for guitars with asymmetric necks. The wall mount closes under pressure to clamp around the neck of the guitar. The holder guard cams provide additional locking and prevent the guitar from turning in the holder. The wall mount is robustly constructed, but nonetheless low weight and requires minimal space to mount.
