Material	plastic yoke, steel clamp
Special features	high quality flocking cover; with holder for bow
Instrument support	flocked

For use in the concert hall, music school or at home, the new König & Meyer violin holder for music stands keeps your instrument easy to hand. The holder can be mounted on all tubes to max. 1.181" diameter using the steel clamp with protecting rubber pads. The violin is clasped at the curved end of the peg box to prevent inadvertent adjustment of the pegs. The depth of the holder means it is virtually impossible to remove the instrument inadvertently nor can it fall from the holder. The bow holder integrated at the side perfectly complements the flexible holder. The durable flocking cover and additional Velcro protector protect the violin finish and prevent damage from bumps or knocking.
