Visibility

Rod combination 2-piece folding design

Quality level

Leg construction round base

Award 26200_DDBD_Siegel_nominiert|,26200_red dot|

Special features knurled screw is impossible to lose;
silent and smooth height adjustment;
stable, lightweight round steel base with
plastic cover;
circumferential rubber profile reduces
undesirable vibration and footfall noise

Type black

Price display

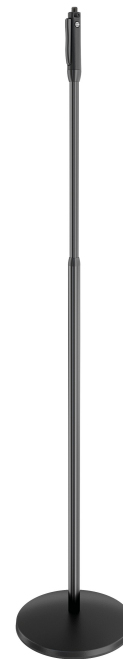

Threaded connector 5/8"

Height adjustment one-hand clutch

Material rod combination made from aluminum,
handle bar zinc die-cast

Height from 41.54 to 68.31"

Base diameter 10.83"

The new star in your show!

The avant-garde, one-hand microphone stand is setting new standards in design and function. The elegant combination of triangular-shaped sections and the new design of the slender one-hand adjustment mechanism go harmoniously with standard microphone clips and microphones. The integrated knurled screw is impossible to lose and makes tightening and positioning the microphone clip easy. The stand's simple elegance loses nothing by the addition of König & Meyer's classic swivel arm. The height of the stand can be adjusted soundlessly, simply and easily using the unique one-hand clutch. The stand is significantly lightweight, but nonetheless stable due to the ingenious round base with an integrated steel plate with an attractive plastic cover. The base's circumferential rubber profile reduces undesirable vibration and footfall noise even when the stand is tilted far over to the side. Damage to flooring (e.g. parquet) is also prevented.
