Boom arm clamping	T-bar locking screw
Boom arm length	from 17.13 to 29.33"
Boom arm	2-piece telescopic design

Quality level

Material	steel
Base diameter	11.81"

Significant Stand Point! The larger tubing reaches a height of 66.929" and as such is well suited for taller individuals. The sleek clutch provides for user friendly height adjustment and it is easy to fix in place. A very heavy round cast-iron base with a diameter of 11.811" provides the stand with both exceptional stability and a small footprint. The circular rubber insert ring filters foot step sounds and reduces the transmission of unwanted sounds. The stand weighs 13.656 lbs and is equipped with an extendable boom.
