Max. load capacity*	110.231 lbs
Type	black
*	With centric loading, on a horizontal surface and without lateral forces (wind, shocks etc.)
Height adjustment	locking screw with push-button system
Price display	
Material	aluminum
Height	from 62.20 to 97.40"
Quality level	
Base diameter	61.34"
Tube end(s)	diameter 1.378"

The XL version among the speaker stands. Sturdy and stable and completely made of aluminum tubes. Solid base tubes with 1.378" diameter and large rubber end caps guarantee a stable and secure stand. In comparison to a "normal" speaker stand the root circle is much larger and amounts to remarkable 61.338". The max. height reaches 97.401" and thus offers versatile application possibilities. The clamp equipped with the push-button system enables a user-friendly height adjustment of the stand. The clamping screw provides additional stability and vibration-free hold of the speaker. Further special features are the pull-out guard for the extension tube, the integrated shock absorber and a mounting aid for the speaker cabinets. The stand is foldable for easy transport. The stand can be turned into a lighting stand with suitable accessories.
