

26750

Speaker stand

Product variant

26750-022-55 - black

Technical Data

Leg construction	round cast-iron base
Visibility	
Special features	mounting aid included; speaker will be fixed with flange adapter
Height	from 36.61 to 56.30"
Rod combination	2-piece folding design
Type	black
Base diameter	17.72"
Height adjustment	locking screw and safety hook
*	With centric loading, on a horizontal surface and without lateral forces (wind, shocks etc.)
Max. load capacity*	77.162 lbs
Price display	
Quality level	
Material	steel
Tube end(s)	diameter 1.378"

Space-saving speaker stand with a large, flat cast-iron base (ø 17.716"). The solid steel construction impresses with its stability and supports speakers weighing up to 77.093 lbs when the load is centred. For optimal sound reinforcement height, 3.937" steps can be set between 36.614 and 56.299". The slim clamp with safety hook is easy and comfortable to use. The end tube has a diameter of 1.378" and is therefore suitable for all corresponding flange bushings. The range of applications can be extended with a variety of accessories such as a projector tray (26747), mounting adapter (19580), etc.
