*	With centric loading, on a horizontal surface and without lateral forces (wind, shocks etc.)
Price display	
Leg construction	flat steel plate
Quality level	
Base dimensions	19.25 x 19.25"
Material	steel

Attractive stand for lights and speaker cabinets. Thanks to the heavy, flat steel plate, the stand is suitable for use where space is at a premium. A carrying handle, a cable management and four sturdy feet are further useful features. Two of the feet are also height-adjustable, allowing continuous compensation for uneven floor surfaces of up to 0.118". This ensures exceptional stability and a perfectly wobble-free setup at all times. The height is fixed with a safety hook and secured with a low-noise, backlash-free clamping screw. The slim design of the clamp enables space-saving transportation and ensures a stylish appearance. The usable height is between 55.905 and 95.275" and can be reached in 5 steps of 7.874". The integrated M10 threaded bush enables the attachment of a crossbar or the direct attachment of lights. The maximum load capacity when fully extended is 44.092 lbs.
