

26727

Speaker stand »Pro«

Product variant

26727-000-55 - black

Technical Data

Visibility

Height adjustment spring-loaded bolt and locking screw

Special features includes two height-adjustable feet for exceptional stability on uneven surfaces; integrated shock absorber; mounting aid included; gradual height adjustment system: depending on the requirements, there are three ways to position the distance rod

Rod combination 2-piece folding design

Quality level

Max. load capacity* 110.231 lbs

Type black

* With centric loading, on a horizontal surface and without lateral forces (wind, shocks etc.)

Price display

Leg construction flat steel plate

Material steel

Height from 43.70 to 71.26"

Tube end(s) diameter 1.378"

Base dimensions 21.65 x 21.65"

Our strongest speaker stand with space-saving base plate. Thanks to the heavy, flat steel plate (21.653 x 21.653"), the stand is ideal for use where space is at a premium. Depending on requirements, there are three ways to position the pole. In addition to the centric and off-center position, the tube combination can also be mounted in the corner. A carrying handle, a cable management system and four stable feet are further useful features. Two of the feet are also height-adjustable, allowing continuous compensation for uneven floor surfaces of up to 0.118". This ensures exceptional stability and a perfectly wobble-free setup at all times. The usable height is between 43.7 and 71.259" and can be reached in 4 steps of 6.889". The tried and tested K&M clamping screw and the robust locking bolt are used for fixing. The maximum centric load capacity with full extension is 110.231 lbs.
