| Size when folded | 7.80 x 0.98 x 2.68"                 |
| Type             | black                               |
| Price display    |                                     |
| Material         | steel                               |
| Base diameter    | 13.86"                              |

The low tripod stand serves as a base for all instrument pegs from the K&M range. The robust and durable steel construction with swivel legs ensures a stable, wobble-free stand, even on stages and in narrow orchestra pits. The feet are locked in the end position to prevent accidental movement. Up to 4 instrument pegs can be attached. The practical stand can be quickly and compactly folded for transport.
