| Tube end(s) | diameter 1.378", integrated threaded bush M10 for crossbars |
| Type | black |

Attractive stand for lights and smaller speaker cabinets. Thanks to the heavy, flat steel plate, the stand is suitable for use where space is at a premium. Depending on requirements, there are three ways to position the distance rod. In addition to the centered and off-center position, the tube combination can also be mounted in the corner. A carrying handle, a cable management and four sturdy feet are further useful features. The height is fixed with a safety hook and secured with a low-noise, backlash-free clamping screw. The slim design of the clamp enables space-saving transportation and ensures a stylish appearance. The usable height is between 55.905 and 95.275" and can be reached in 5 steps of 7.874". The integrated M10 threaded bush enables the attachment of a crossbar or the direct attachment of lights. The maximum load capacity with centric loading in the middle position is 44.092 lbs.
